

HECKEWERTH®

BESPOKE SOLUTIONS FOR STABLE CONNECTIONS

Coating solutions of a wide variety of panels
Production of high-quality furniture parts

RELIABLY CONNECTED WITH HECKEWERTH

SINCE 1876

We are competent, reliable and successful experts in the industrial coating of panels materials. As one of Europe's largest family-owned panel coating specialists, established back in 1876, we blend tradition with innovation. We are committed to fostering long-term, collaborative partnerships and maintaining fast, agile decision-making.

Our range of services includes **coating plywood, chipboard, MDF and HDF**, as well as innovative materials such as sandwich and plastic panels. In addition, we offer precision manufacturing, meticulous finishing and professional packaging of furniture components – complemented by reliable, on-time delivery.

We are an established, strategic partner to leading industrial companies in the **furniture, door and caravan sectors around the world**. Drawing on our experience and in-depth expertise, we test new ideas, identify opportunities for optimisation at an early stage and develop bespoke solutions for our customers.

Our production takes place exclusively at our **site in East Westphalia**, at the heart of the German furniture industry. From here, we maintain close links with international procurement markets and consistently pursue a responsible approach to environmental management.

WHAT WE STAND FOR

Panel coating and finished furniture parts

At Heckewerth, we stand for **consistently high quality** coupled with **reliability**, all while combining traditional expertise with state-of-the-art technology. Our company stands for **precision and sustainable practices** and is committed not only to protecting wood, but also to preserving its natural value for the long term. Trust, a customer-focused approach and the highest quality standards have formed the basis of our success for a century and a half.

OUR CERTIFICATES

FSC-STD-40-004

FSC Chain of Custody Certification means that our forest supply chain is unbroken for our FSC®-certified products and supports responsible forestry. www.fsc.org

PEFC ST 2002-2020

We support sustainable forest management and our timber products come from sustainable sources.

DIN EN ISO 9001

Our quality management system complies with international standards and serves to guarantee continuous improvement.

DIN EN ISO 14001

Our environmental management system reduces our environmental impact and makes efficient use of resources.

DIN EN ISO 45001

We attach the utmost importance to occupational health and safety and ensure safe working conditions.

DIN EN ISO 50001

Our measures are designed to systematically improve our energy efficiency.

Quality

Precision, reliability, efficiency and process quality.

Diversity

A wide range of services, a broad selection of materials. Small-scale batches to mass production.

Technology

Ongoing investment in our fleet of machines.

Is your sector included?

We're looking forward to new challenges!

Enquire about your sector:

OUR SECTORS

Automotive

Furniture industry

Building components

Leisure and sport

Tailored projects for other sectors
e.g. yacht and boat building

OUR FIGURES

21.750 m²
storage capacity

250
employees

100.000 m²
production area

153.000 m²
coated panels per year

OUR LOGISTICS

JUST-IN-TIME PLANNING
TAILORED LOGISTICS SOLUTIONS
FLEXIBLE DELIVERY OR COLLECTION OPTIONS

Packaging

Specific packaging solutions and transport protection, including the use of bespoke customer packaging.

Customised documents

Custom documents, bespoke barcodes and tailored packaging designs ensure accurate identification and tracking.

Digitization

Integration of EDI-FACT and other interfaces to enable the efficient digitalisation of communication processes via interfaces.

Distribution

Our fleet of company-owned HGVs ensures flexible and prompt delivery, delivering even urgent orders on time.

OUR STRENGTHS

Effective processes that guarantee accuracy and reliability and deliver first-class results at every stage.

Quality control

Continuous monitoring and ensuring the highest quality standards at every stage of production, including through the use of laser technology.

Technical equipment

A large fleet of production equipment guarantees a high degree of operational reliability and dependability.

Gluing

The use of highly effective adhesive systems (glues) developed specially for us, allowing us to ensure a reliable and stable bond between materials.

OUR PRINCIPLES

Our aspiration

We forge "strong bonds" with our products, our cost-effectiveness and a personal approach, and in doing so creating win-win situations for all involved.

Our drive

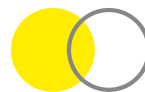

We deliver products that make life more pleasurable – from furniture pieces and attractive doors to comfort features in leisure vehicles.

Our goal

Tailored solutions for robust connections – in every aspect of our business operations.

OUR GUIDING PHILOSOPHY

Togetherness

Long-term collaboration with employees, customers and business partners based on building relationships.

Panel + Foil

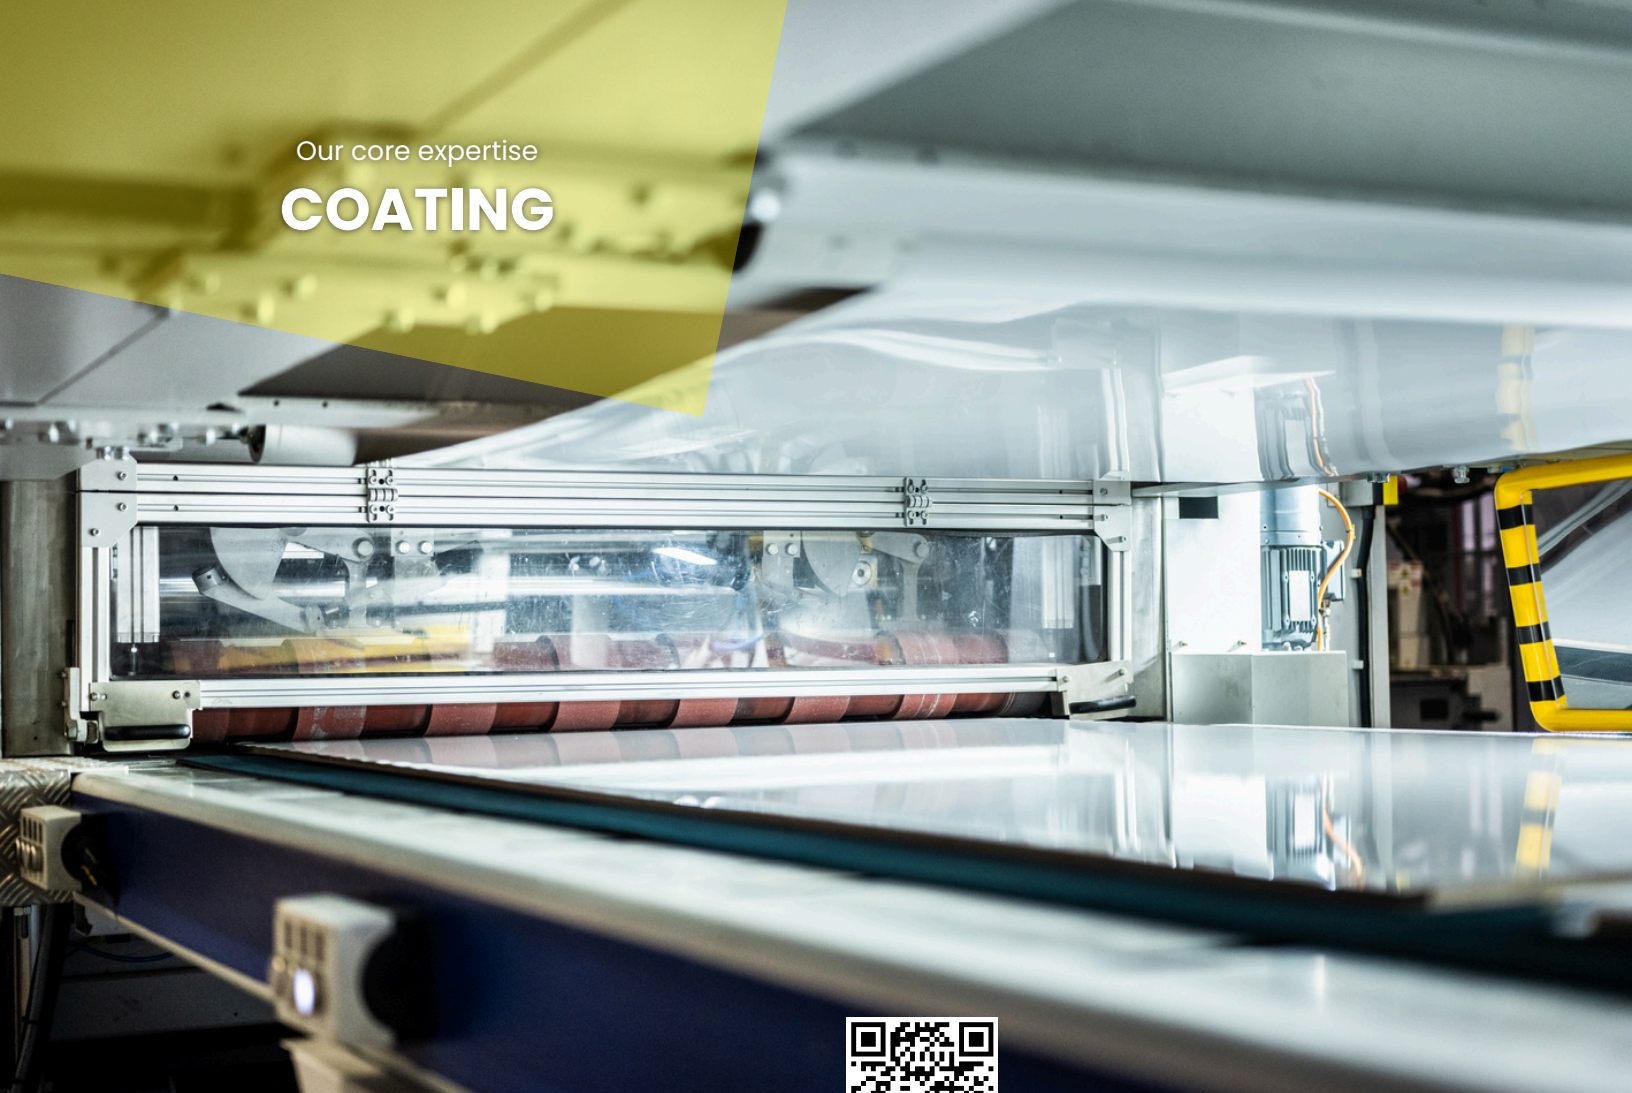

A strong, high-quality and reliable bond between panel materials and various coating materials, and their fabrication into furniture components.

Ideas + Projects

Customised, tailor-made and exceptional solutions that we integrate into our process.

Our core expertise
COATING

THE SUCCESSFUL COMBINATION OF PANEL AND FOIL

We are internationally recognised for the decorative coating of panel materials and have extensive experience in processing a wide variety of materials.

High performance across all production volumes

- Manufacturing ranging from small batches to mass production
- Fast and reliable order processing
- Consistently high product quality
- Flexible processing of a wide variety of raw panels

State-of-the-art production technology

Our 100,000m² production facility is equipped with state-of-the-art technology and offers:

- A high level of automation
- Unbeatable precision in manufacturing
- Efficient and stable production processes
- High production capacities

Quality and flexibility

Through ongoing investment in our processes, we ensure:

- Stable and reliable production processes
- Flexible implementation of individual
- Customer requirements
- Top quality standards
- Dependable and on-time delivery of standard and bespoke products

OUR STRENGTHS ...

- Tailored advice
- Small batches to mass production
- A broad selection of materials
- Highly effective adhesive systems (glues) developed specifically for us
- Consistent coating quality
- Outstanding service

ARE YOUR ADVANTAGES.

- Solutions for individual requirements
- Production tailored to demand thanks to high storage capacity
- High level of satisfaction with results
- Reliability thanks to personal support throughout the project

PANEL MATERIALS

- Chipboard
- Plywood sheets
- MDF boards
- HDF boards
- Lightweight panels
- Blockboard
- Composite panels
- Plastic panels
- Insulation and fire protection boards
- Other panels

COATING MATERIALS

- CPL (Continuous Pressure Laminate)
- HPL (High Pressure Laminate)
- Finish foils
- Priming foils
- Plastic films
- Metal foils
- Felt and other coating materials

SURFACE FINISH OPTIONS

- Super matt
- Matt
- Satin matt
- Gloss
- High-gloss

Our core expertise

FURNITURE PARTS

TAILOR-MADE FURNITURE PARTS

We are an experienced partner to the furniture industry and manufacture products from self-coated panels and melamine-faced boards. Our product range extends from cabinet components and shelves to high-quality furniture fronts. Thanks to CAD design, precision manufacturing and bespoke logistics solutions, we reliably satisfy a wide range of customer requirements.

Quality control

Ongoing monitoring and ensuring the highest quality standards at every stage of production, including through the use of laser technology.

Technical equipment

State-of-the-art technology for precise and efficient processing.

Material flexibility

Processing melamine-faced boards and a wide range of coating materials in accordance with customer wishes, thanks to flexible manufacturing capabilities and a broad choice of materials.

OUR STRENGTHS ...

- Processing melamine-faced chipboard from all leading suppliers
- Manufacture and machining of furniture components coated in-house
- CPL and finish foil coating
- Production of "extra-wide" furniture components up to 1.53 m wide
- Extensively automated processes for consistently high quality
- High production capacity thanks to several assembly and drilling lines
- Tailored advice
- Attractive prices combined with the highest quality

ARE YOUR ADVANTAGES.

- Precise solutions for your specific requirements due to bespoke manufacturing
- Easy further processing thanks to a high degree of dimensional accuracy
- Customised decorative options are available thanks to close partnerships with manufacturers of paper, foil and melamine-faced chipboard
- Consistent product quality due to highly automated processes
- Flexibility and rapid response times thanks to flexible production facilities

OUR SERVICES

Tailored advice and CAD design

The perfect solution for your project – from planning to completion.

Machining to final dimensions

Precise cuts to meet your specific requirements.

Edging the materials

High-quality edge finishing for perfect results.

Folds and grooves

Precise machining of edge profiles and grooves to suit your specifications.

Drilling surfaces and end faces

Precise drilling for a wide range of applications.

Fitting and inserting anchor bolts

Reliable, in accordance with your specifications and drawings.

... is a core commitment for us, giving equal weight to environmental integrity, economic stability and social welfare. We aim to create long-term value and continuously reduce our environmental footprint.

To this end, we rely on innovative technologies, environmentally friendly resources and close collaboration with our employees and partners.

SAVINGS – ON TRACK TO OUR TARGETS

Energy: Approx. 30% per production unit between 2018 and 2025 through the use of modern technologies.

Paper: Approx. 1,000 kg of paper saved thanks to the increasing digitalisation of processes.

CO₂: A 45% reduction in carbon emissions between 2018 and 2025 through the use of environmentally friendly technologies.

100% of our field service fleet has switched to hybrid and electric vehicles.

ENERGY MANAGEMENT

We ensure that our energy efficiency is continuously optimised with our certified energy management system.

Technology

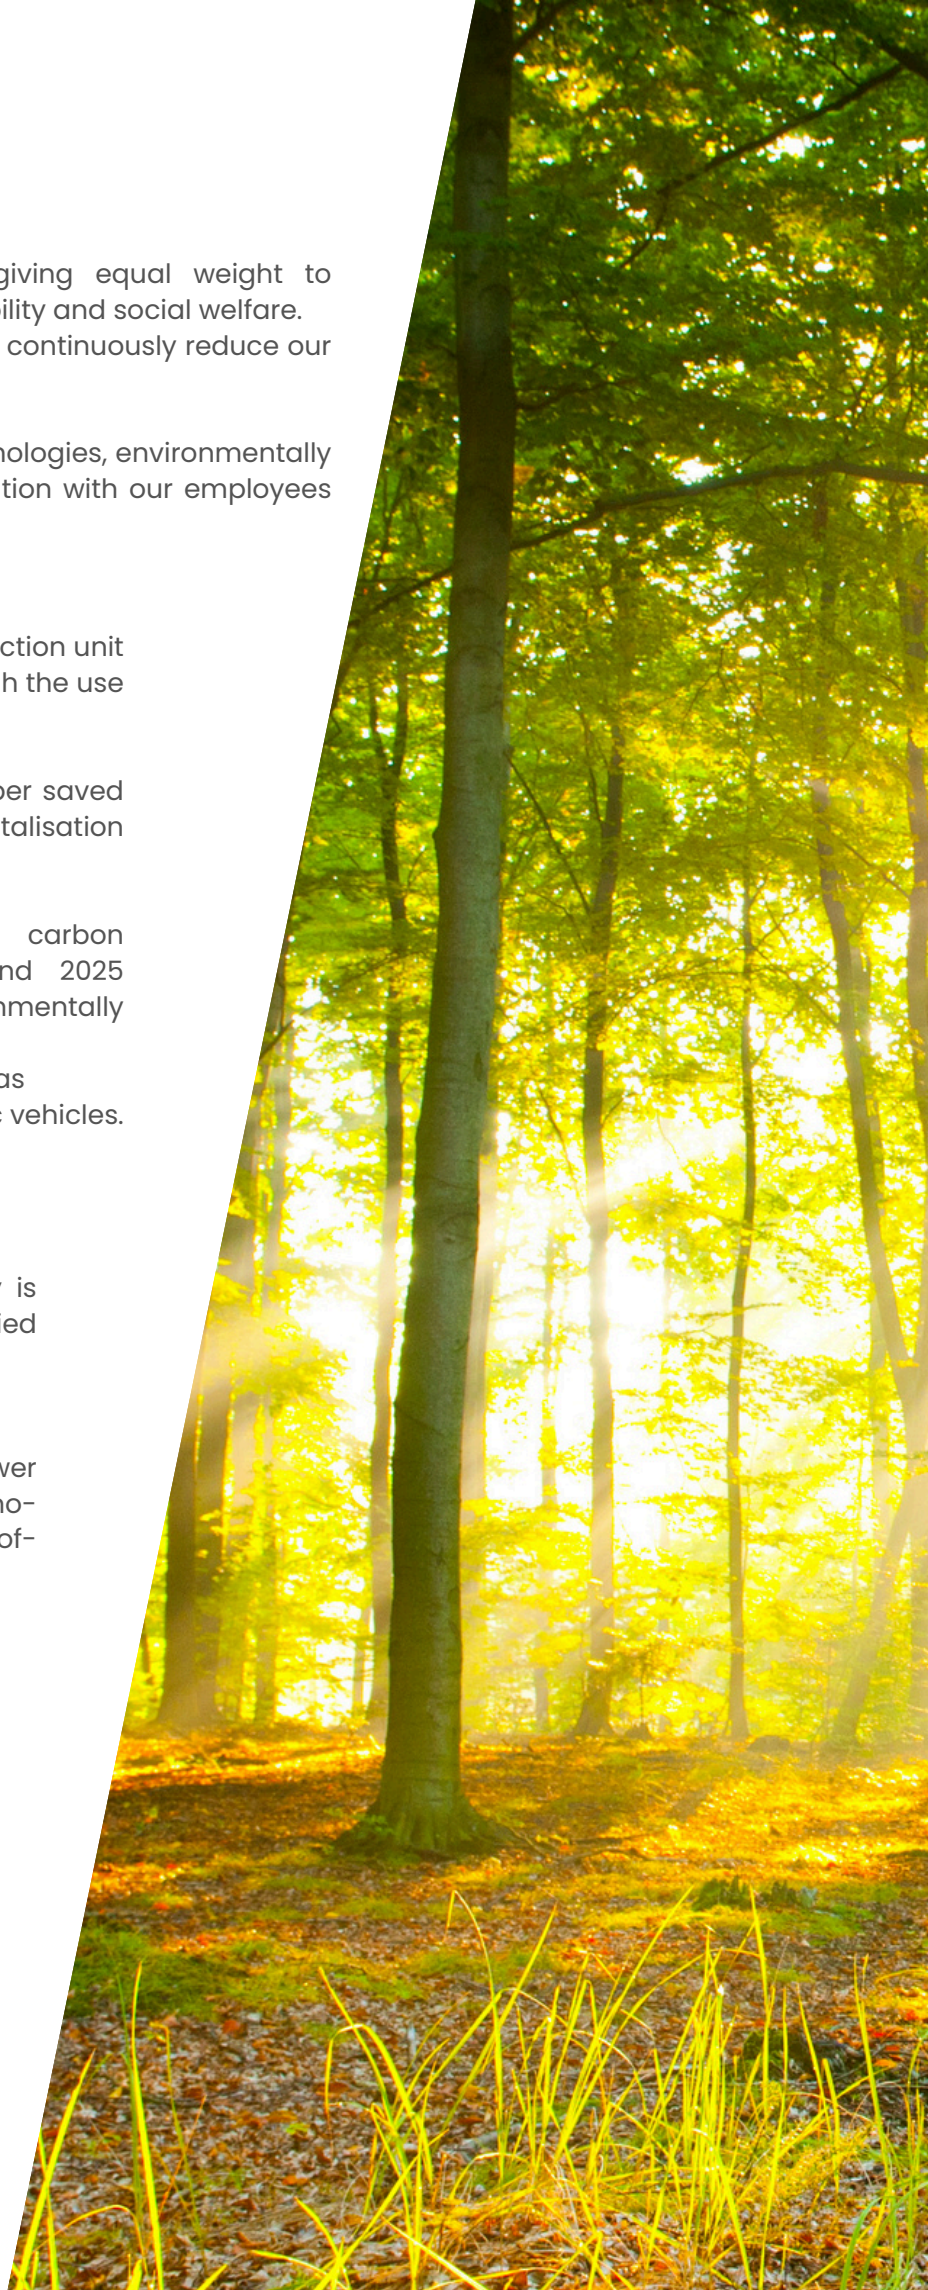

We operate combined heat and power plants and use energy-saving technologies such as LED lighting and state-of-the-art compressed air systems.

Administration

As part of our move towards a paperless office, we are digitalising our administrative processes, thereby significantly reducing our paper consumption.

Employees

Through initiatives such as the Job-Bike scheme, we promote environmentally friendly mobility and encourage our workforce to use sustainable modes of transport.

Our responsibility
THINKING LONG-TERM.
CREATING VALUE.
